The search was limited to Research article and English language. This was achieved by clicking on the “Refine Search” button. This is a quick and dirty search to retrieve articles from CINAHL. The more professional and comprehensive way to conduct a literature search always starts with a subject heading search.

Check the boxes on the right in conjunction with each citation. After selecting your references, the Folder shows it has items. This is a temporary folder that can store your references. Then go to the Folder.

Working with the Results (Cont.)

The screenshot displays a search results interface. On the left is a 'Folder List' with the following items: Result List Items (2), Images (0), Videos (0), Persistent Links to Searches (0), Saved Searches (0), Search Alerts (0), Journal Alerts (0), and Web Pages (0). The main area is titled 'Result List Items' and shows 'Results: 1-2 of 2 Page: 1'. At the top of this area are icons for Print, E-mail, Save, Export, and Remove All. Two search results are listed:

1. [Pediatric nursing in the context of the HIV/AIDS epidemic in resource-poor settings – balancing the "art and the science"](#), (includes abstract) Govender L; Holistic Nursing Practice, 2006 Sep-Oct; 20 (5): 247-54 (journal article - research) PMID: 16974181 CINAHL AN: 2009284775 **Cited References (27)**
2. [Empathy, inclusion and enclaves: the culture of care of people with HIV/AIDS and nursing implications](#), Hodgson I, Journal of Advanced Nursing, Aug2006; 55 (3): 283-90 (journal article - research) PMID: 16866822 CINAHL AN: 2009265302 **Cited References (40)**

Each result has a 'Linked Full Text' icon and a small 'X' button to its right. At the bottom of the results area, it says 'Page: 1'.

From the temporary folder, you can print, email, save, and export your search results. The print, e-mail, and save will give you the option to transfer your references into APA style.
